

SDG Value Map

Measurement of scale

About this tool:

Mapping out the various SDG's you commit to as a company gives a clarified overview of your current state of play. By filling in the value scale, it becomes clear which SDG gets more attention than the others, and how your company can engage more in the future to create more impact.

Step 1: Indicate which SDG's are part of the companies core values by checking the boxes.

Step 2: Indicate by colouring in the section to what extent you are committed to these SDG's.

Step 3: Get to work with the results and see where you as a company can make a difference.
